THE SPIRAL WOMAN

ESCAPE FROM ANDROMEDA

NOT ONLY CARTOONS!

Roberto Piaia, Painter and Sculptor, world premiere Creator of the "spiral" form in sculpture, gave rise to imagination by creating a comic book enriched with a series of oils on canvas and impeccable drawings, telling us a story full of symbolic messages.

And it's from the beautiful and majestic Galaxy of the Constellation Andromeda that kicks off the science fiction Saga, made of hundreds of billions of stars that starting from the center form giant spiral arms.

Populated only by Women, Queen Eva and some maids manage to escape, following a ferocious attack which destroyed a part of it. The wicked Aisha and her followers are the perpetrators, coming from a black hole hidden at the margins of the Milky Way.

They have very skillfully concentrated and projected a mass of gravitational waves upsetting their balance.

Both ancestries have paranormal powers!

They find themselves after light years on the planet Earth, where the struggle between the women closer to the Good of Andromeda, and those evil ones from the black hole of the Milky Way begins.

The idea behind the story is the result of Roberto Piaia's imagination, while the text is written by Carmen De Guarda.
